DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claims 1-12 recite the limitation "zeotype" throughout. The phrase "zeotype" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "type"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).
4. Claim 7 recites the limitation "the mesoporous zeolite." There is insufficient antecedent basis for this limitation in the claims if claim 7 depends from claim 1. It is suggested that applicant amend the claim to depend from claim 6.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1725

6. Claim 12 is rejected under 35 U.S.C. 102(e) as being anticipated by Herbst et al.

Herbst et al. (US 6,887,814) discloses a catalytic material comprising an immobilized homogeneous catalyst within zeolite crystals with a non-crystallographic mesopores system and a mesopores volume of the zeolite crystals above 0.25ml/g (column 2, lines 50-55). Suitable catalytic materials include manganese and cobalt (see Example 4).

As each and every element of the claimed invention is taught in the prior art as recited above, the claims are anticipated by Herbst et al.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claim 12 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,887,814.

Although the conflicting claims are not identical, they are not patentably distinct from each other.

Art Unit: 1725

US 6,887,814 claims a catalytic material comprising an immobilized homogeneous catalyst within zeolite crystals with a non-crystallographic mesopores system and a mesopores volume of the zeolite crystals above 0.25 ml/g (claim 1). US '814 does not specifically claim the catalyst material. However, the specification defines the immobilized catalytic material as Mn and Co, which are metals of group 7 and 9.

It is noted that the specification can always be used as a dictionary to learn the meaning of a term in the patent claim. *In re Boylan*, 392 F.2d 1017, 157 USPQ 370 (CCPA 1968). Further, those portions of the specification which provide support for the patent claims may also be examined and considered when addressing the issue of whether a claim in the application defines an obvious variation of an invention claimed in the patent. *In re Vogel*, 422 F.2d 438, 441-42, 164 USPQ 619, 622 (CCPA 1970). In this case, it is the position of the examiner that the catalyst material claimed by US '814, as defined in the specification, is an obvious variant of the "at least one element belonging to groups 5-14" instantly claimed.

Allowable Subject Matter

9. Claims 1-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

10. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach or suggest a catalytic dehydrogenation process in the presence of a catalyst having the claimed characteristics.

Art Unit: 1725

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
